WHAT IS GLOBAL HONEYWELL USERS GROUP (HUG)?

The Honeywell Users Group (HUG) conference provides a forum for users of Honeywell process control and industrial automation systems to exchange technical information and provide feedback to Honeywell on their equipment and service needs.

HUG facilitates work with other Honeywell users' committees worldwide, including the **User Input Subcommittee (UIS)** and the **Customer Advisory Boards (CABs)**. All present and future Honeywell users and OEMs are eligible to attend the Honeywell Users Group conference. The **2024 Honeywell Users Group Steering Committee** can also waive this eligibility rule to accommodate special cases.

Users making up the Honeywell Users Group (HUG) represent various process automation industries.

STEERING COMMITTEE.

The committee develops the agenda for the conference based on topics and trends deemed the most important to the user community.

The Steering Committee holds at least one general meeting (conference) every year. The form, format and content are determined based on feedback from members.

Current HUG Steering Committee members assisting in developing the 2024 HUG conference agenda are listed on the next page.
