CO₂ CAPTURE AND SEQUESTRATION

Annual storage must **GROW 20X** in next 10 years to align with IEA Sustainable Development Scenario (840 Mt by 2030)

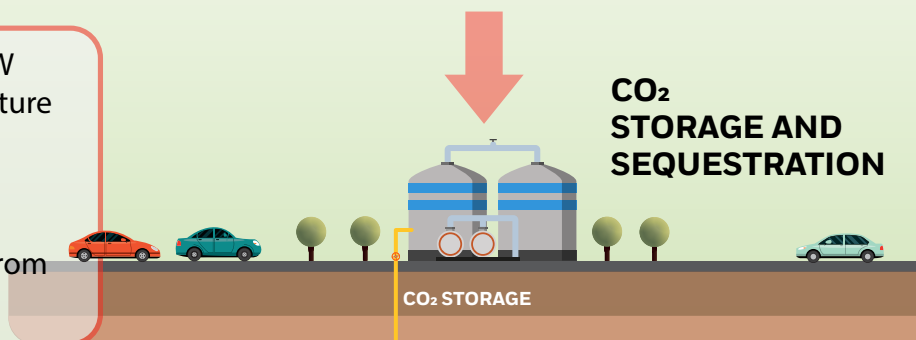

CARBON CAPTURE PLANT WITH HONEYWELL TECHNOLOGIES

Honeywell CO₂ Solutions enable more than **90% EMISSION** reduction from energy and industrial CO₂ point sources

For a typical power plant (650 W capacity), applying carbon-capture technology would capture **3.4 MILLION TONS** of CO₂ annually, equivalent to removing nearly 735,000 cars from the road each year

CO₂ STORAGE AND SEQUESTRATION

With thousands of power and industrial plants operating around the world, we can make a significant impact on emissions today.
