# LINE LOCATING SERVICE

Honeywell has been a trusted and recognized name in the utility services industry for a long time. We continuously look for ways to better serve our utility clients and address industry challenges. According to a Common Ground Alliance report, the estimated annual direct and indirect cost of damages to buried utilities in the U.S. is \$30 billion. Honeywell's transformative utility line locating service helps utility companies that want to reduce the risk of damage to their assets, make technological improvements and be a leader of change in the locating industry.

## HONEYWELL'S LINE LOCATING SERVICE INCLUDES

- Survey-grade GNSS accuracy, capturing the latitude and longitude of locates down to 1"
- Locate Walk Back Feature providing exact GIS coordinates of original location for damage claims
- Robust Ticket Management Platform with risk assessment and analytics, viewable to the Utility
- Digital library of utility assets to improve safety, prevent damages and reduce buffer zones
- Worker Assist, connecting the field to support through intelligent wearable devices allowing hands-free video and chat

## THE BENEFITS OF HONEYWELL'S LINE LOCATING SERVICE

### OVERALL EFFICIENCIES &

**COST REDUCTIONS:** Accurate GIS data points and digital maps can reduce buffer zones leading to a reduction of 811 notifications to utilities, which reduces truck rolls and lowers administrative costs.

### MAPPING THE FUTURE:

By building an underground digital library, we have the opportunity to improve safety and prevent damages by providing stakeholders with accurate data of where the utility lines are located electronically. Our utility locating services will offer a different "digital" outcome to aid in future industry advancements.

### TRUSTED UTILITY PARTNER:

Utilities have consistently chosen Honeywell for our strong company

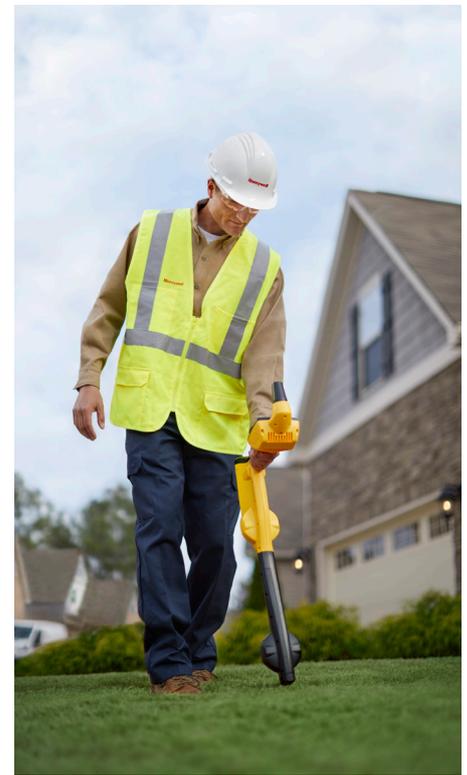

history, financial stability, proven metering, and field installation (water, electric & gas), program management, product innovation, reliability, and our service commitment to customers.

### DEDICATION TO SAFETY:

At Honeywell, ensuring a safe work environment for EVERYONE is our cultural driver. Safety is not a training course that you pass or a checklist that you complete – it is a way of thinking. Safety First infiltrates all aspects of our program delivery.

### STRATEGIC PARTNERSHIPS:

Honeywell is determined to bring the most comprehensive solution to our utility partners. We have established strong partnerships with other industry leaders to provide the best of the best in program offering and delivery.

As a utility partner focused on safety and quality, it was a natural extension to expand to the line locating market given the fact that Honeywell is already delivering meter installations and field services to gas, water, and electric utilities. Honeywell Smart Energy is providing a smarter approach to underground utility line locating. We help protect your assets, prevent damages, while building underground digital libraries to put the power of data in the hands of the utility. With data, we are creating lines that cannot be erased.
