ACCELERATE YOUR CO₂ COUNTDOWN

Honeywell CO₂ Solutions enable cost-effective emission reductions today

Low CO₂ Power
Low CO₂ Steel

CO₂ CAPTURE AND SEQUESTRATION
Annual storage must GROW 20X in next 10 years to align with IEA Sustainable Development Scenario (840 Mt by 2030)

For a typical power plant (650 Mw capacity), applying carbon-capture technology would capture 3.4 MILLION TONS of CO₂ annually, equivalent to removing nearly 735,000 cars from the road each year

CARBON CAPTURE PLANT WITH HONEYWELL TECHNOLOGIES

Honeywell CO₂ Solutions enable more than 95% EMISSION reduction from energy and industrial CO₂ point sources

CO₂ STORAGE AND SEQUESTRATION

With thousands of power and industrial plants operating around the world, we can make a significant impact on emissions today.
