ACCELERATE YOUR CO$_2$ COUNTDOWN

Honeywell CO$_2$ Solutions enable cost-effective emission reductions today.

Low CO$_2$ Power
Low CO$_2$ Steel

POWER PLANT
STEEL PLANT
CEMENT PLANT
OTHER INDUSTRY
Low CO$_2$ Cement
Low CO$_2$ Products

CO$_2$ CAPTURE AND SEQUESTRATION
Annual storage must GROW 20X in next 10 years to align with IEA Sustainable Development Scenario (840 Mt by 2030)

CARBON CAPTURE PLANT
WITH HONEYWELL TECHNOLOGIES

Honeywell CO$_2$ Solutions enable more than 90% EMISSION reduction from energy and industrial CO$_2$ point sources

For a typical power plant (650 W capacity), applying carbon-capture technology would capture 3.4 MILLION TONS of CO$_2$ annually, equivalent to removing nearly 735,000 cars from the road each year

With thousands of power and industrial plants operating around the world, we can make a significant impact on emissions today.
