

CREATE A SMARTER NETWORK WITHOUT REPLACING YOUR NETWORK

Honeywell's NXCM cellular module allows you to simply upfit your installed meter base, turning any existing gas meter into a smart meter.

Reducing Proprietary Network Limitations

By using open standard, public wireless, the NXCM cellular module reduces the challenges and costs that come from being held captive to proprietary networks. Compatible with a variety of meter brands, when you add in Cellular IoT, you realize the power of network connectivity and system interoperability.

Maximize Network Performance. Minimize Costs.

REDUCED CAPEX

IMPROVED PRODUCTIVITY

ENHANCED CONNECTIVITY

METER COMPATIBILITY

At Honeywell, we're helping you create a smarter network without replacing your network. Welcome to the future of connected utilities.
