# HONEYWELL
# WEIGH & DISPENSE

## Strengthen Compliance and Optimize Weigh & Dispense Processes

## Weigh & Dispense processes are critical to life sciences manufacturers as they directly impact product quality, compliance and waste.

Tracing an audit trail with traditional paper-based methods is challenging and prone to errors that must be carefully, manually discovered. Combine these factors with the challenges of gathering data from different sources like SAP, weigh scales, warehouse records and other data points and the result is a very cumbersome, expansive workload.

**Honeywell Weigh & Dispense** solution enables efficient management of weigh and dispense processes. Data integrity is maintained and compliance is enforced. Data collection is automated and the weighing process is optimized with this cGMP-compliant solution. It facilitates numerous weigh methods, integrating with SAP ECC/S4HANA and weigh scales. Weigh & Dispense streamlines the manufacturing process while achieving detailed real time transparency and adherence to 21 CFR Part 11 compliance requirements.

Honeywell Weigh & Dispense solution is available on-premise as well as on cloud platform.

*Honeywell Weigh & Dispense gives you a single version of truth for recipes, master batch records, and procedures. The Weigh & Dispense module ensures accurate material genealogy at every stage of production.*

**Honeywell**

# KEY FEATURES OF HONEYWELL WEIGH & DISPENSE

**Multiple weigh methods** for various W & D scenarios

**Compliant** with 21 CFR part 11 for eSignature

**Integrated** with SAP ECC and S4HANA (IM, WM, QM)

**Weigh scale integration** and calibration management

**Excipient adjustments** based on API Potency

**Full electronic** lot traceability and audit trail

**Label printing** and management

**Container** management

**Risk and safety** warning notification

**More than 20** dispensing reports

**Multilingual** support, including Asian languages

# WHY HONEYWELL

- **Compliant solution for batch process manufacturing**
  - ○ Weigh & Dispense, Master Batch Record(MBR) & Electronic Batch Record (EBR), Electronic Logbooks & Procedures

- **Built for regulatory compliant industries**
  - ○ 21 CFR Part 11 and cGMP compliant
  - ○ Templates significantly reduce the validation effort

- **Leverages SAP application landscape**

- **Rapid deployment and roll out**
  - ○ Out of the box integration with SAP S4/HANA
  - ○ Libraries and templates for manufacturing process

- **Small footprint and minimal configuration**

- **Quicker payback on investment**

**THE FUTURE IS WHAT WE MAKE IT**
