

2022 HONEYWELL USERS GROUP CONSULTING CORNER

Honeywell

The Experts Are Back

The process industries are facing the most tumultuous times in recent history. The phrase “Do More with Less” has never been more true. Many organizations are looking for the most efficient and effective way to embark on the radical changes they need to get and stay ahead of the curve.

Our experts are back at Honeywell Users Group EMEA in the Consulting Corner to discuss the business and process challenges that you may be facing and help you find a solution that can match your outcome goals and budget. Discover the benefits leading companies in your industry are realizing from critical programs— and how you can too.

6 Reasons Why the Consulting Corner Can Help You Reach Your Goals

1. Bring Us Your Challenges—No Matter How Difficult

Honeywell Experts at HUG can help you improve your business and operations. Whether you are facing the challenges of modernization, initiatives that transform the use of your data or protecting your facility from the threat of cyber attack. Regardless of the size of the challenge, our Industry Experts will help you take it on and provide immediate advice you can use. You choose the topic or initiative that matters most to you and we'll set you up with the right expert.

2. Undivided Attention to You and Your Challenges

You and your challenges are the center of attention between you and your Honeywell Process Expert. Ask the questions you need to improve your operations. You may be amazed at what a focused brainstorming session can do.

3. Industry Expert Recommendations You Can Walk Away With

Walk away with knowledge you can put to use right away. Your Honeywell Expert has years of experience in the process industries to understand your challenges.

With the added knowledge of the real-world benefits realized by some of the leading companies in the

process industries, your Honeywell Expert will be able to give you suggestions on how to get started.

4. An Industry Expert You Can Call On for Advice After HUG

When you return back to your site, you've got a Honeywell Expert you can call on. Your Honeywell Expert can help you analyze the results of your first step and can be called upon to help you continue your improvement journey.

5. Get Advice On the Right Demo for You

Unique challenges sometimes call for unique solutions. Your Honeywell Expert can help you understand how Honeywell offerings work together to solve your challenges. Conveniently located near the Knowledge Center, experts in the Consulting Corner can guide you through product demonstrations that will make the most sense for you, given the challenges you face.

6. Did we Mention Your Consulting Session is Included in Your HUG Conference Registration Fee?

Hence there is no additional fee. Zip, zero, nada.

Industry expert recommendations you can walk away with

Some hot topics to consider for your discussions

Is your workforce future-ready?

Every worker in the plant should be well equipped to solve mission critical problems in real-time, work with data-driven insights to reduce losses and increase operational efficiency. Learn from our experts on how you can enhance workforce productivity, competency, and compliance resulting in long term sustainable business results. It will expedite your journey towards autonomous operations.

Talk about emissions

With a third of Global methane emissions coming from the Industrial sector it is no wonder that Governments and Industry are laser focused improving their performance. The trend to move fugitive emissions monitoring from periodic to continuous solutions provides operators with a greater insight on emissions sources which drives efficiencies through reduction of lost product and a more predictive approach to maintenance. Contact the Honeywell onsite consultant, and explore how Honeywell can support your emissions reduction activities.

Need to use data to help make every day your best, safest and most sustainable day of operations?

Whether you're looking to optimize asset, process unit, or plant-wide performance; effectively manage safety and operational risk; increase the productivity of operations teams; or better address energy and emissions challenges, we're here to help. Learn how Honeywell Forge industrial-grade software can help you build your business for the future, please ask for our Honeywell Forge experts.

Are you spending most of your time chasing the "real" truth?

Do you know if your measurement system is accurate and precise? When it comes to your inventory, the journey from data to information to wisdom is critical. Find out how you can easily manage all aspects of your measurement system.

Need to implement a cyber security plan, but don't know which measures are appropriate for your plant?

Leveraging our process control and cyber security expertise and working together with leading security partners, Honeywell delivers complete, proven solutions designed for the specific needs of your process control environments. Explore the best path for your organization to protect your control system against ever-evolving cyber threats.

Looking to modernize your system before maintenance efforts get out of control?

Honeywell's continuous evolution approach allows for incremental upgrades not only to improve plant availability and reliability, but also to protect capital investments and intellectual property. Learn how to move to the latest technology and modernize with minimal or no disruption to operations.

Looking for the latest in control system technology to reduce project schedule, cost and risk?

Fast changing technology makes control system integration and investment protection important. Honeywell's next generation family

of modular control systems improve flexibility and reliability while reducing cost and risk associated with integration of different control systems. Learn how you can benefit by selecting the right solution for your need.

Tasked with creating a safer, more secure environment for employees and your operations?

In the rapidly changing global community, you're dealing with increased security risks and challenges—but you're also facing increased pressure to improve the efficiency of your operations. Learn how integrating safety and security with your control system can make safety second-nature.

The Consulting Corner at Honeywell Users Group is Your Starting Point

Whether kicking off a new initiative or taking the next step in your ongoing program.

Now is your turn to take your challenges into the spotlight.

How to Request a Session

Talk to your Account Manager and request a session with a Honeywell Expert in the Consulting Corner at HUG. Or fill out your Consulting request when you register for HUG, your topic and a brief description.

We'll match your topic up with a Honeywell Expert and give you time to talk in Madrid.
